Safe Zone

Just us, anywhere.

A private space where chats and calls never leak.

💬 Chat · 📞 VoIP calls · 🎤 Concert mode — every phone is its own server

🛒 **Pre-order** | Pricing | Features

🛡 Nothing leaks — that is why it is called Safe Zone

Test version · Android only · features are subject to change.

Notices

📄 PDF guide

▼ 1. Notice — General information

- This app and website are a **test version** and may differ from the final release.
- Download the app for your role (one app per phone · Android 7 or later).
- Chats and records are deleted automatically after 1 day. Your location is never tracked.
- Test figures come from AI-based virtual simulations and are not exact. We would like to run a live test with 10,000+ phones.

▼ 2. Notice — Features

- **No records on other servers.** Neither chats nor 📞 VoIP calls. Every phone is its own server.

- **Privacy.** No sign-up, ID, password or phone number. The call directory shows call signs and IDs, not names.
- **Internal security.** AES encryption on the phone + OTP + fingerprint cross-checks. Each tier (1–5) has its own app.
- **Agency chat rooms.** Same agency = all agency rooms open (🏢 whole agency + 🎤 one room per artist).
- **Concert mode.** Every phone in the audience plays together for surround sound, perfectly in sync.

▼ **3. Notice — Pricing**

- One 5-tier set · fixed price · VAT included · no discounts.
- Questions: consultation and e-mail sohobuup@naver.com

What it does

Security Encryption · OTP	**VoIP calls** Phone to phone	**Chat** Agency · artist rooms
Concert All phones together	**Music** Winamp style	**Server** Your phone is the server
Safety No records left	**5-tier system** One app per tier	**Updates** Automatic

Security

No way for anything to leak

🔑 OTP — now: OTP on every message · turn-based OTP when it gets crowded

✍️ Next: a digital signature per phone · approval chain down the tiers

🕐 Chats and records are deleted after 1 day

📍 Location is never tracked · no contacts, SMS or camera access

VoIP calls

Your voice goes straight from phone to phone

📞 Agency (tier 1) · manager (tier 2) · artist (tier 3) · same agency only

📒 Directory with call signs and IDs instead of names · 🟢 online · ⚪ offline

👥 1:1 · 3-way · group calls up to 6 · ➕ add someone mid-call

🔒 End-to-end encrypted between phones · no recording · no logs

Chat

Keep the whole agency alive

🏢 Agency room + 🎤 a room for every artist

⏳ My turn — when it is crowded, messages go out in OTP turns with a countdown

📤 Send effect — 🔐 encrypting with OTP → 📤 sending → ✅ sent · ding

🛡 Anti-fan control — ⚠ watch · 🚪 kick · ⛔ 3-day · 🚫 permanent ban

Concert mode

Every phone in the venue sounds as one

▶ Start — sync and wait → 10-second countdown → live

⚫ Live off — sync and live stop together after 3 · 2 · 1 · ⛔ emergency stop = force quit

🎯 Position re-synced every 4 s · fast-forward, rewind and ⏭ next track follow on every phone

🎤 Concerts are grouped by artist · managers pick the artist they are running

Music (Winamp style)

One URL and every phone plays together

🔗 Any URL · saved on the phone

🔐 Only URLs approved by the manager are downloaded · each phone at a random time · stored on the phone

🌳 On the same Wi-Fi or hotspot, phones pass the song on to each other (relay)

📶 One notice shares the venue Wi-Fi name and password with every phone

Safety

Records are not left on other servers

Every phone is a server · the relay only passes locked text and cannot read it

Calls are phone to phone and leave no trace

No sign-up · no phone number · minimal permissions

5-tier system

One app per role, permissions built in

01 Owner (agency)

02 Manager
03 Artist
04 Fan club officer
05 Fan

Updates

Always getting better

New screens arrive and refresh automatically (random time per phone)
The manager taps “Run APK update” → every phone downloads it, with % and count shown
Applied only when the developer’s signature matches

Pricing (fixed · Korean VAT included)

5-tier set (test)	**₩2,750,000**
Update 1	**Free**
Update 2	**₩550,000**
Contract 5-tier set	**₩82,500,000**
Update after contract	**₩24,750,000 each (30% of the set · all tiers replaced)**
On-site concert support	**₩1,100,000,000**

Use cases: entertainment · clubs · business · associations · performances · events · schools · groups

Prices are fixed · for questions, consultation and e-mail sohobuup@naver.com

📲 Download the test version · set 001 · one app per role

👑 Tier 1 · Owner

📋 Tier 2 · Manager

⭐ Tier 3 · Artist

💌 Tier 4 · Fan club officer

🎉 Tier 5 · Fan

1. Tap your role and download the file (about 0.2 MB).
2. Open it and allow “Install unknown apps” this one time.
3. In Settings, enter the same 01 Agency and 03 Artist as everyone in your group.
4. After that, updates arrive automatically.

▼ 🤖 **How was it made with Claude Code? (v)**

1. Park Yang-ho gives short instructions in Korean, with photos and videos.
2. Claude edits the app, website, shop and PDF manual together in a cloud workspace.
3. Every change is tested first on virtual phones (up to 150) at phone size.
4. Results go straight into new numbered folders on his PC.
5. One PowerShell line builds the five APKs with a verification log.
6. Real phones (S22 · Note 5) confirm it, and the loop starts again.
